

Some medications require a prior authorization for coverage under your pharmacy benefit plan. This program requires prescribers to submit clinical information to help guide members and prescribers toward cost-effective and clinically appropriate medications for their health condition.

This document shows medications for which your plan may require prior authorization.

This document does not guarantee coverage of your medications. Some plans have specific coverage requirements or exclusions. Please refer to your plan document or call our Member Support Team at 844-454-5201 and we would be happy to help!
