

SmithRx Step Therapy List

Not all benefit plans include the Step Therapy program. Check your plan materials to see if this information applies to you.

What is Step Therapy?

The Step Therapy program is a quality and safety program that can help you lower your medication costs. Many medical conditions can be treated using a variety of medications. In some cases, there is a very large difference in cost among the medications, but only a little difference in the way the medications work. Step Therapy requires members to try cost-effective “first-choice” medications before try (or “stepping up to”) more expensive “second choice” medications. Many people find the first-choice medications work just as well for them.

We base the Step Therapy program on U.S. Food and Drug Administration and manufacturer dosing guidelines, medical literature, safety, accepted medical practice, appropriate use and benefit design.

What if my doctor says a first-choice drug isn't right for me?

If your doctor decides that a first-choice medication is not right for you and prescribes a second-choice medication, please have your doctor submit a prior authorization to SmithRx.

What happens at the pharmacy?

The pharmacist enters your prescription into the computer system. If your prescription is a second-choice medication, the system will check your claims history. If you have filled prescriptions for first-choice medications within the previous six months, the pharmacist will fill your prescription for your second-choice medication.

If you are required to try a first-choice medication, you have three options:

- You or your pharmacist can call your doctor to change your prescription to a first-choice medication.
- You can pay full price for your second choice medication prescription.
- You or your pharmacist can ask your doctor to request a medical necessity exception.

If your plan approves the request, it will cover your prescription. If your plan does not approve the request, you can still choose another option. You and your doctor make the final decision about the medication that is right for you.

Your benefit document defines actual benefits available and may exclude coverage for certain drugs listed here. Check your benefit information to verify coverage or view your personal benefit information on our website. This list may contain trademarks or registered trademarks of pharmaceutical manufacturers that are not affiliated with your health plan. This list can change or expand from time to time without prior notice. When we list brand-name drugs, programs can also apply to any available generic equivalents.
